SINCE 2006 LAST UPDATED: OCT 2026 TARGET: Next.js + Framer Motion

Motion & Interaction Spec

Developer-handoff reference documenting scroll-driven animations, micro-interactions, responsive viewport adjustments, and easing tokens designed for the Hamsalekha premium event production platform.

Token Name	Curve	Duration / Parameters	CSS / Framer Motion Code Representation
`ease-default` Standard UI transitions	⊗	400ms	`cubic-bezier(0.25, 0.1, 0.25, 1.0)`
`ease-in-out` Symmetric continuous flows	⊗	300ms	`cubic-bezier(0.42, 0.0, 0.58, 1.0)`
`ease-spring` Bouncy micro-interactions	≋	Mass: 1 Stiffness: 80 Damping: 10	`type: 'spring', stiffness: 80, damping: 10, mass: 1`
`ease-scroll-reveal` Cinematic section reveals	⊗	600ms	`cubic-bezier(0.16, 1.0, 0.3, 1.0)`
`page-transition` Cross-route animations	⊗	500ms	`initial: { opacity: 0, y: 20 }, animate: { opacity: 1, y: 0 }`

Fade Up

Default entrance for text blocks and standalone elements. Standard translation combined with rapid opacity sweep.

```
opacity: 0 → 1
translateY: 40px → 0
duration: 600ms
ease: ease-scroll-reveal
threshold: 0.2
```

Fade In

Used for background media and massive image fills where directional translation would disrupt layout harmony.

```
opacity: 0 → 1
no-translation
duration: 400ms
ease: ease-default
threshold: 0.15
```

Slide In L / R

Applied to split-screen components where imagery and content panels lock together in an overlapping dynamic.

```
opacity: 0 → 1
translateX: ±60px → 0
duration: 500ms
ease: ease-scroll-reveal
threshold: 0.25
```

Scale Reveal

Designed exclusively for hero elements, core signature cards, or circular medallions. Translates scale coordinates.

```
opacity: 0 → 1
scale: 0.95 → 1.0
duration: 500ms
ease: ease-scroll-reveal
threshold: 0.2
```

Stagger Children

Used in grid lists (e.g. Services, Portfolio columns). Parent element triggers child animation delays sequentially.

```
staggerChildren: 80ms
delayChildren: 100ms
childTemplate: fade-up
trigger: Parent In-View
```

Counter Up

Triggered numeric values. Numbers count up dynamically from zero to target state on scroll-reveal.

```
startValue: 0
endValue: Target Stat
duration: 2.0s
ease: easeOutExpo
trigger: 0.3 Threshold
```

Button Label

Premium Button Interactions

Buttons provide tactical springiness. Primary variants include a gold linear gradient shimmer moving left-to-right on loop or trigger.

```
Hover: scale(1.02) | shadow: 0px 8px 24px rgba(15,38,71,0.15) | duration: 200ms ease-spring
```

```
Active: scale(0.98) | shadow: 0px 2px 4px rgba(15,38,71,0.1) | duration: 100ms
```

SERVICE

Service Name

A brief description of this service offering and what it includes for the client.

Learn More →

Service Card Hover System

Cards lift along the y-axis to create spatial depth. Overlays and internal elements scale independently.

```
Hover Card: translateY(-4px) | shadow-blur: 24px | ease: ease-default (300ms)
```

```
Hover Inner Image: scale(1.05) | ease: cubic-bezier(0.16, 1, 0.3, 1) (600ms)
```

```
Hover Action Arrow: translateX(4px) | ease: ease-spring
```

How far in advance should we book? +

FAQ Accordion Collapsible

Smooth content expansion using CSS grid or height transitions that dynamically recalculate layout flow.

```
Expand/Collapse: height('auto' ⟷ 0px) | overflow: hidden | duration: 400ms ease-in-out
```

```
Indicator Icon: rotate(45deg) on expand | color: #8F6D1B → #FAF8F3
```

Field Label

Enter your response

Form Field Focus Spec

Inputs adapt their visual boundaries to signal keyboard focus seamlessly. Supports float-up labels.

```
Focus Border: stroke('#C9A227') | fill('#FFF') | duration: 200ms ease-default
```

```
Focus Ring: box-shadow: 0px 0px 0px 4px rgba(201,162,39,0.15)
```

1 **Hero Parallax & Staggered Reveal**

At coordinate y=0, the background hero image scales slightly down while moving at a 0.3 rate relative to body scroll. The text elements follow a strict entrance chain: Badge (delay 200ms) → Headline (delay 350ms) → Subtitle (delay 500ms) → CTA button (delay 650ms).

2 **Stats Band Counter-Up Activation**

When the `number-strip` module intersects a threshold of 0.3 inside the viewport, all numerical stat blocks (500+, 20 Years, 50+ Crew) count up in unison. Numbers translate from 0 to target coordinates using standard timing parameters.

3 **Services Grid Intersection Reveal**

As the viewport enters Section 3, individual component service cards stagger sequentially. Row-1 fades up first with a 80ms stagger delay between sibling cards, followed by Row-2 as the scroll progress deepens.

4 **Testimonials Slider Loop**

Continuous marquee track auto-scrolling at a subtle, constant speed. If a user moves their mouse coordinate over any testimonial element, the track slows to zero over 300ms using a smooth friction modifier.

Initial Page Load

Coordinated sequence on first paint to minimize cumulative layout shift and create a high-end structural unveiling.

```
1. Logo fades in (0ms → 300ms)
```

```
2. Header slide-down (150ms → 500ms)
```

```
3. Hero Content staggers (300ms → 800ms)
```

Route Fade Out / In

Animate presence mapping for React / Next.js single-page-app view sweeps. Keeps navigation fluid.

```
Exit current: opacity → 0 | duration:
250ms
```

```
Enter new: opacity → 1, y: 20px → 0 |
duration: 300ms
```

```
Ease curve: ease-in-out
```

Media Placeholder Spec

Image and video elements mount using skeletons. Shimmer moves linear diagonally.

```
Shimmer track: linear-gradient(90deg)
```

```
Animation timing: Infinite loop | duration:
1.5s
```

```
Transition to media: opacity: 1 | duration:
400ms
```

Viewport	Parallax Behavior	Hover / Gestures	Duration Scale / Threshold Rules
`Desktop (1440px+)`	Full rate (0.3 background speed)	Complete hover states active	`Multiplier: 1.0x | Stagger delays enabled`
`Tablet (834px)`	Reduced rate (0.15 background speed)	Hover converted to active-on-tap	`Multiplier: 0.8x | Stagger caps at 3 items`
`Mobile (390px)`	Parallax disabled (Static layouts)	No mouse hovers. Scale-on-tap only.	`Multiplier: 0.7x | Stagger disabled completely`
`Reduced Motion`	Zero parallax or translation	Fades-only fallback	`prefers-reduced-motion: reduce hook triggers global override`
